About Me

I am a dedicated Software Engineering student at 1337 School. With a passion for technology and a strong foundation in programming languages, I possess excellent problem-solving and analytical skills. I am knowledgeable in software development methodologies and demonstrate effective teamwork and communication abilities. I am eager to contribute my skills and pursue a successful career in the software engineering field.

Education

SOFTWARE ENGINEER STUDENT

MOHAMMED VI POLYTECHNIC UNIVERSITY - 1337 CODING SCHOOL | 2021- PRESENT

FIRST-YEAR BACHELOR'S STUDENT IN PHYSICAL SCIENCES

MOULAY ISMAIL UNIVERSITY - FACULTY OF SCIENCES | 2018-2019

BACHELOR OF PHYSICAL SCIENCES

SALAM HIGH SCHOOL | 2017-2018

Projects

FT_IRC

Contributed to the development of an IRC server project, implementing server functionality, handling user connections, and ensuring seamless communication within the IRC network using C++.

FT_TRANSCENDENCE

This project consists of creating a website for the mighty Pong contest including the user accounts, chatting in channels and playing the game pong features.

technologies used: NestJS, NextJS, Socket.io, Tailwind CSS, Typescript, PostgreSQL

INCEPTION

This project aims to broaden our knowledge of system administration by utilizing Docker. I virtualize several Docker images, creating them on our new personal virtual machine.

PRODUCT MANAGEMENT SYSTEM

Developed a dynamic CRUD and static search application using HTML, CSS, and JavaScript. Efficiently managed product data using client-side storage., User-friendly interface for seamless product management and quick searches, enhancing user experience.
